All In Credit Union Continues to Advance its Technology Infrastructure Adding Sync1 Systems' Loan Origination System

AUSTIN, TX / ACCESSWIRE / October 30, 2023 / All In Credit Union recently selected Sync1 Systems' LOS (Loan Origination System) solution for more configurable technology, ease of integration, and agile lending operations. They were looking for a partner who listened and delivered on their requests to advance the credit union's competitiveness and member experience to the next level for years to come.

"When determining what technology we needed to help All In Credit Union continue to grow, we knew we needed to advance our LOS to more current technology and be more responsive to the changing environment. How efficiently they integrate with other service providers was another advantage for us. We were also looking for a true partner of credit unions who was very interested in the success of the credit union industry and in helping us all move forward. Sync1 Systems remains responsive to us through the entire process. We are excited about the future of our credit union, and with them being our LOS partner," stated Todd Peeples, SVP of Sales and Lending.

As Sync1 Systems' financial technology is incorporated into the loan application process, it allows credit unions to spin up new lending products quickly and easily. Sync1 Systems' LOS enables configuration for individual loan application processes, and its open API architecture saves credit unions time while providing a seamless and convenient experience for members.

"As we all know, the lending industry is as challenging and competitive as ever. All In Credit Union understands this very well and is helping lead the way to become a more competitive option and regain market share with digital opportunities and fintech partnerships. The All In Credit Union model is also helping other credit unions benefit from the ideas they bring to the table. We are very excited to be a part of the solution and at the forefront of helping them, and all credit unions that join the Sync1 Systems' family, be more competitive in the marketplace," added Steve Maloney, CEO of Sync1 Systems.

About All In Credit Union

All In Credit Union started as Army Aviation Center Federal Credit Union in 1966 during the height of the Vietnam Conflict. As soldiers were deployed, they and their families needed access to low-cost financial services while stationed at Fort Rucker. Over the years, our membership base has expanded, and our goal is to provide more people than ever access to affordable financial services they can trust from an organization committed to excellence.

All In Credit Union is ranked among the best credit unions in the country, as evidenced by the consistent awarding of a 5-star Rating from BauerFinancial, Inc., the nation's leading independent credit union rating and research firm. We have grown into a full-service financial institution with more than 180,000 members and more than $3 billion in assets. In addition to the increased number of products and services, we've expanded to 30 branches in Mobile, Southeast Alabama, the Florida Panhandle, and Mississippi.
We look forward to the continued journey and hope you're "All In!"
